State Secretaries

Amendment to MOP019 Display Procedure

Dear Secretaries

On November 14 2011 an amended MOP019 Display Procedure was published on the MAAA website and electronic copies forwarded to all State Associations. MOP019 was amended following a discussion paper containing suggested amendments, and the reasons for them, being circulated to the State Associations for comment and feedback.

The attached document, Australian Model Aircraft Flying Display Requirements, has been produced following critical comments on MOP019 received from the Organisers of the Luskintyre event in NSW and the Cobram Air Races event in VIC. These have been widely distributed across Australia.

This document is issued to clarify and provide guidance/education to members either organising a Flying Display or attending and participating in a display. The document clearly outlines the Civil Aviation Safety Authority (CASA) requirements for model Flying Displays and the supporting paragraphs in MAAA MOP019 for member information.

Please circulate the attached document to all your Clubs and members as quickly as possible. As we are not sure who has been contacted regarding this we believe that it important that it does get directly to Affiliated Members. This enables them to have the MAAA position clarified before they make their own decisions.

If you receive any questions relating to MOP019 or the CASA Regulations please refer these to the MAAA President or Secretary. To maintain a consistent approach please do not answer them yourselves. If you receive any questions relating to any specific display event, please just refer these to the relevant State Association.

Yours sincerely
Model Aeronautical Association of Australia

Kevin Dodd – Federal Secretary
